MORE BENEFITS, MORE EFFICIENCY, MORE ACTION!

STRATEGY

Especially with today's cost, the international market gets the stage for the selection of suppliers. The continuously rising momentum of the international market and the resulting opportunities for procurement have to be interpreted correctly and decisions should be taken accordingly.

QUALITY CONTROL

The remit of our quality control starts with the selection of suppliers and extends over the incoming inspection of all manufactured products, in-process control to release the products at the end of the production chain. We test the finished products according to our customers specifications and methods.

A close-up photograph of a WABCO MAXX 22L brake chamber. The chamber is a cylindrical metal component with a polished, reflective surface. A black, cylindrical pushrod is visible protruding from the front of the chamber. The background is a soft, out-of-focus grey, and the lighting creates strong highlights and shadows, emphasizing the metallic texture and the mechanical details of the part.
